TABLES

2021

Antonio Citterio

Description

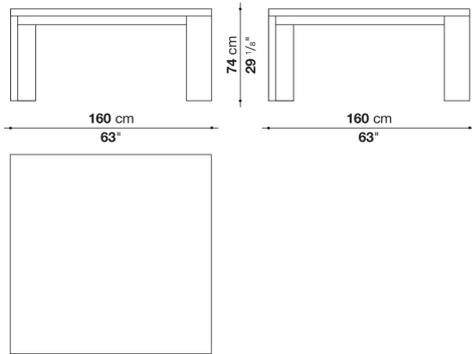

A striking table, with an essential design underscored by thick profiles and asymmetrical legs, making it a piece of furniture that dominates any room. Available in square and rectangular sizes, the table now comes in a semigloss Chilean tineo wood version, a precise stylistic feature also found in other pieces in the collection, as well as in more classical natural wenge or brushed light, brushed black and grey oak. The special folding technique used to create it highlights the table's refined workmanship, creating perfect continuity between the surface and the edges of the top.

Technical information

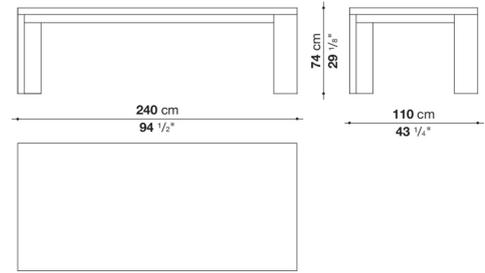

Frame and top
multi-layered wood panel, veneered plywood panel with honeycomb-core and wood particles
Ferrules
felt
